STEM Honors Special Program Scholarship Rider 2024

1. Program Authorization & Scope

This policy rider applies specifically to all students enrolled in degree programs within the STEM Division (Physics, Chemistry, Computer Science, Engineering, Mathematics) who receive specialized institutional endowment funding.

2. Rigorous Performance Standards

Section 2.4 Honors Attendance Mandate: For all students designated under the STEM Honors Program or majoring in accredited STEM disciplines with departmental award status, the minimum mandatory attendance requirement is 80% per term.

Attendance is calculated continuously across both theoretical lectures and practical laboratory sessions. The standard institutional threshold of 75% is superseded by this 80% benchmark for STEM scholars.

3. Enforcement & Probation

Any STEM scholar whose term attendance rate falls below 80% is automatically placed on departmental scholarship probation. If the attendance is not raised above 80% within the next reporting cycle, the scholarship stipend is revoked.
